

August 2010 Board Meeting

Request for Temporary Authorization

BRYAN DAMRON

Mr. Damron has requested a temporary authorization to practice civil engineering in accordance with §6760 of the Professional Engineers Act. He has submitted a fee of \$68.75 as required in §6799(b).

Mr. Damron is a licensed civil engineer in Colorado, the state where his business is located.

Mr. Damron is currently a structural engineer at Lyntek, Inc., in Lakewood, CO.

The project for which Mr. Damron is requesting a Temporary Authorization are various structures located at MolyCorp Minerals rare earth mine in Mountain Pass, CA. The applicant will be designing the main process building, a structural steel building with a full span bridge crane. In addition, he will be designing the foundations and pads for the conveyors and tanks. A full description of the project is included as attached.

Mr. Damron will be preparing the civil/structural engineering design for the building and foundations. The conveyors and tanks will be designed by others.

Mr. Damron has stated that he intends to practice in CA beginning on September 1, 2010 and complete the project within 180-days.

Mr. Damron will attend the August Board meeting. The Board should be prepared to request that the applicant demonstrate knowledge of the application of seismic forces in the design of structures, or in any other phases of civil engineering involved with this project. In addition, the applicant should specify what aspects of the project would be completed under the temporary authorization.

August 2010 Board Meeting

Request for Temporary Authorization

STEVEN NAPOLITANO

Mr. Napolitano has requested a temporary authorization to practice civil engineering in accordance with §6760 of the Professional Engineers Act. He has submitted a fee of \$68.75 as required in §6799(b).

Mr. Napolitano is a licensed civil engineer in Texas, Nevada and New Jersey, the state where his business is located.

Mr. Napolitano is currently a Principal at SNS Architects & Engineers, in Montvale, NJ.

The project for which Mr. Napolitano is requesting a Temporary Authorization is a one-story building expansion in Rialto, CA. The approximately 79,000 square foot expansion will be to an existing distribution center for FedEx Ground. There are also expansions to the existing parking areas for employee parking, loading and unloading and truck paring areas.

Mr. Napolitano will be preparing the civil/site engineering design for the building and parking additions, and designing the building foundations. The building will be a pre-engineered building designed by others.

Mr. Napolitano has stated that he intends to practice in CA beginning on September 1, 2010 and complete the project within 180-days.

Mr. Napolitano will attend the August Board meeting. The Board should be prepared to request that the applicant demonstrate knowledge of the application of seismic forces in the design of structures, or in any other phases of civil engineering involved with this project. In addition, the applicant should specify what aspects of the project would be completed under the temporary authorization.
